## About Us

We have been in business since 1989, and as always, we continue our commitment to provide progressive, high quality care for our patients. As a group, we are continuing to broaden our knowledge base and manual skills, so that each patient can be offered a wide range of clinically proven treatment options to give them the best quality rehabilitation experience.

I am very proud of our current team. Each of our 6 locations are currently directed by some of the very best physical therapists in the area. Good quality people lead to good quality care.
